

PROJECT HELP (1ST PROJECT)

DUE DATE

Feb 6 1st Project -- Design a lever and give it a name (hammer, throwing stick, tongue depressor, teeter totter, catapult). Students may use additional resources and will be able to keep their project.

Any lever is acceptable; so, there are no “required” designs, resources, or results

Project with craft sticks (if students want to build a catapult):

Use wide craft sticks for the lever portion (with cap and under the fulcrum)

Use narrow craft sticks for the fulcrum

CATAPULT KITS

A few students were given an actual “kit” catapult to construct. Students may need assistance with these since the joints can be tough to push together.

If a joint/part breaks, any fix is fine -- glue or tape, etc. Or, simply a slightly disabled catapult. The finished catapults will be returned to the instructor in exchange for a kit similar to their sibling’s kit.
