SMELTER DIAGRAM

The process of turning preheated rock/ore into molten cast iron.

1. Gases released
2. FeO is an iron oxide
3. Carbon monoxide or dioxide are released
4. CaCO₃ limestone
5. SiO₂ quartz
6. CO₂ gas released
7. Preheated blasts of air are added (bellows).
8. Slag CaSiO₃
9. Molten Iron

REMEMBER THESE THINGS

Remember God knows our needs before we even know how to express them. The Iron Age began after Moses wrote down the first five books of the Bible, including Deuteronomy, yet God knew the resources were important to help His chosen people prosper.

Deuteronomy 8:7-9 *For the Lord your God is bringing you into a good land, a land of brooks of water, of fountains and springs, that flow out of valleys and hills; a land of wheat and barley, of vines and fig trees and pomegranates, a land of olive oil and honey; a land in which you will eat bread without scarcity, in which you will lack nothing; **a land whose stones are iron and out of whose hills you can dig copper.***
