Complete the Water Cycle

This water cycle diagram needs some more color!

Read the description of each part of the cycle, then draw a picture of the missing steps.

Evaporation:

The sun heats the ocean water and turns some of it into vapor.

Condensation:

The vapor gathers and turns into clouds.

Precipitation:

Clouds move around in the sky and fall back to earth as fog, rain or snow.

Storage:

The precipitation is absorbed by the ground or bodies of water.
