

In the Bible, water often symbolizes cleansing and indeed it's our body's best friend both inside and out. Raindrops form on dirt particles to clean our air. "Wash yourselves; make yourselves clean; remove the evil of your deeds." Isaiah 1:16

WATER IS:
Odorless, tasteless, and transparent/colorless. Water dissolves many molecular substances. It's the standard used in measuring volume, weight, density, and specific gravity. More than 70% of earth, of our muscles and organs, and of our diet is or should be water for hydration and cleansing. Many cleansing systems are sustained by water's presence.

VOCABULARY:

Ocean Circulation	water cycle	filtration (3)	surface run-off	standard	erosion

1. Our kidneys serve as a _____ system for fluids and require lots of water.

2. The _____ _____ circulates water from Earth's surface to the air and back to the land, rivers/streams, lakes, and the ocean.

3. _____ _____ transfers water or melted ice from mountains to valleys to streams, rivers, and lakes to the oceans.

4. _____ _____ moves water in the ocean supplying oxygen, nutrients, and cleansing power to prevent stagnation.

5. To survive in the wilderness where water may contain harmful impurities, carrying a _____ system is advisable. Clean water is essential to stay alive.

6. Water that seeps into the ground and into aquifers/ground water undergoes _____ and is often safe to drink (spring water).

7. We use water as a _____ of comparison for many measuring purposes.

8. Fresh water rivers contain many dissolved solids from _____ &_____.

FRESH VS OCEAN WATER

Name 2 examples of freshwater organisms and include something unique about their design.

Name 2 examples of saltwater organisms and include something unique about their design.
